

ForestryVac®

Over the last few years mainland Europe and the UK have seen an increase in OPM (Oak Processionary Moths/Caterpillars) and Brown-Tail Moths due to changes in our climate.

These insects pose a risk to people and animals, causing rashes, eye irritation and in more severe cases, breathing difficulties.

Our ForestryVac® tackles issues caused by OPMs and other pests in an environmentally friendly way without harmful chemicals and all from the safety of the ground. Powered by an onboard Honda engine and mounted on a steel trolley with all-terrain lockable wheels, the ForestryVac makes light work of combatting these critters out in the field where mains power is not an option.

The Honda engine is suitable for a wide range of heavy-duty applications such as construction equipment, tillers, generators, welders, pumps and other industrial applications.

Engine features:

- 3.1 litre fuel capacity
- OHV design enhances combustion efficiency
- High power-to-displacement ratio
- Easy starting with an automatic decompression system and an easy-to-grip soft recoil starter handle
- High quality materials and purpose-built components which ensure reliable, long-term use
- Meets world's most stringent environmental legislation
- Low fuel and oil consumption
- Reduced vibration and noise levels

UP TO 4 STOREYS
12M/40FT

7,166 LPM AIR FLOW

H CLASS
VACUUM

CLEAN HIGHER.
FASTER & SAFELY
FROM THE GROUND

AN EFFICIENT, SAFE AND MOBILE PEST CONTROL VACUUM

IDEAL FOR:

- High reach cleaning (up to 4 storeys high)
- For tackling oak processionary moths (OPM) and brown-tail moths
- Robust all terrain trolley with castors

ForestryVac®

An efficient, safe and mobile pest control vac

Machine specification

Motor Wattage:	2400 Watt Max (5.8HP Honda petrol engine)
Water Lift:	95"
Air Flow Movement:	7,166 LPM
Cyclonic Entry Port:	50mm
Container:	78 Litre
Weight:	92kg Generator with frame & wheels; 76kg Steel drum with motor head; 16kg
Cabel length:	8.5m
Dimensions (cm):	104(l) x 62(w) x 130(h)

HEPA (High Efficiency Particulate Air Filter)

TYPE	CLASSIFICATION	EFFICIENCY	PENETRATION
HEPA	H14	99.995%	≤0.005%

Optional add on

SurveyCam Inspection Camera

Please note

- i** As an H-Class vacuum, all emptying and maintenance operations of ForestryVac, including removal of the dust collecting systems, must only be carried out by authorised personnel wearing suitable personal protection. Do not operate without the full filtration system fitted.

Included as standard

8m (50mm) flexi hose

Hose bag

4x self sealing filter bags

ELITE end tools, Straight End tool, Alu Scraper tool & Viper tool

Vac & pole cuffs

Carry bag for poles & accessories

8 ELITE clamped poles & half pole

REACH
12m/
40ft
